## Curriculum Vitae

### Personal Information

28.02.1994 Born in Gansu Province, China

### Experience and Education

2023.10– **Junior Professor (W1)**, *Augsburg University*, Augsburg, Germany  
Current Nonlinear Analysis (Institut für Mathematik)

2022.10– **Postdoc**, *Technische Universität Wien*, Vienna, Austria  
2023.09 In the group of Asst. Prof. Dr. Máté Gerencsér

2020.12– **Postdoc**, *Technische Universität Berlin*, Berlin, Germany  
2022.09 In the group of Prof. Dr. Michael Scheutzow

2020.01– **Research assistant**, *Bielefeld University*, Bielefeld, Germany  
2020.11 In the group of Prof. Dr. Michael Röckner

2016.10– **PhD of Probability Theory**, *Bielefeld University*, Bielefeld, Germany  
2019.12 Supervisor: Prof. Dr. Michael Röckner

2015.09– **PhD of Probability Theory and Statistics**, *Beijing Jiaotong University*, Beijing, China  
2020.07 Supervisor: Prof. Dr. Zhiming Ma

2011.09– **Bachelor of Information and Computing Science**, *Beijing Jiaotong University*, Beijing, China, *GPA – 3.98*  
2015.07 Acquiring merit student and scholarship several times

#### Exchange study

2018 **Seoul National University, Science of Mathematics faculty**  
01.03–30.08 Prof. Dr. Gerald Trutnau (Seoul, South Korea)

#### Research visit

2022 **Technische Universität Berlin**  
20.11–26.11 Prof. Michael Scheutzow (Berlin, Germany)

### Bachelor Thesis

– *Universitätsstraße 14, 86159 Augsburg, Germany*

✉ [chengcheng.ling@uni-a.de](mailto:chengcheng.ling@uni-a.de)

Title *Laws of Large numbers under Sublinear Expectations*  
Supervisor Prof. Dr. Xiangchan Zhu  
Description This thesis studies laws of large numbers under the framework of sublinear expectation introduced by Peng Shige. The main results in this paper include weak law of large numbers and convergence rate laws of large numbers under sublinear expectations.

## Phd Thesis

Title *Stochastic Differential Equations with Singular Drifts and Multiplicative Noises*  
Supervisor Prof. Dr. Michael Röckner  
Link <https://pub.uni-bielefeld.de/download/2941478/2941479/thesis.pdf>

## Teaching-Tutorial

- 2023 Summer semester **Numerics of PDEs**, Lecture for master student in TU Wien, given by Asst. Prof. Dr. Máté Gerencsér
- 2019 Summer semester **Probability theory III-Stochastic differential equations**, Lecture for master student in Bielefeld University, given by Dr. Michael Hinz
- 2017 Summer semester **Introduction to Stochastic Partial Differential Equations**, Lecture for master student in Bielefeld University, given by Prof. Dr. Michael Röckner

## Talks

-2023

- 2023 18.12-22.12 **Mean field interactions with singular kernels and their approximations**  
Path-by-path well-posedness and numerics of singular SDEs (Institut Henri Poincaré, Paris, France)
- 2023 14.12 **Augsburg-Munich Probability Colloquium**  
Regularization by noise (Augsburg, Germany)
- 2023 28.11 **Stochastic Analysis Seminar**  
Regularization by noise (Imperial College London, UK)
- 2023 24.10 **Probability Seminar**  
Regularization by noise (Shanghai, China) (online)
- 2023 17.10 **Applied stochastics Group Seminar**  
Regularization by noise (Hagen, Germany) (online)
- 2023 21.09-22.09 **Workshop: SDEs with Low-regularity Coefficients: Theory and Numerics**  
Numerical analysis for singular SDEs-Milstein scheme (Torino, Italy)
- 2023 17.07-19.07 **The SPDEvent 2023**  
Path-by-path uniqueness for stochastic differential equations under Krylov-Röckner condition (Bielefeld, Germany)
- 2023 27.04-29.04 **17th Berlin-Oxford meeting**  
Numerical analysis for singular SDEs (Berlin, Germany)
- 2023 19.04-21.04 **Seminar**  
Regularization by noise on singular SDEs (Augsburg, Germany)

- 2023 **Tenth Bielefeld-SNU joint Workshop in Mathematics 2023**  
 21.02-24.02 Numerical analysis on regularization by noise for singular SDEs (Bielefeld, Germany)  
 -2022
- 2022 07.12 **Webinar on stochastic analysis 2022**  
 Regularization by Noise for Singular SDEs–PDEs and Rough Path Theory (Beijing, China)  
 (online)
- 2022 **Workshop: The SPDEvent**  
 07.09-09.09 Martingale problem for rough stochastic differential equations (Bielefeld, Germany)
- 2022 **15th International Conference on Monte Carlo and Quasi-Monte Carlo  
 Methods in Scientific Computing**  
 17.07-22.07 Taming singular SDEs: A numerical method (Linz, Austria)
- 2022 **42nd Conference of Stochastic Processes and their Applications (SPA) 2022**  
 27.06-01.07 Taming singular SDEs: A numerical method (Wuhan, China)(online)
- 2022 **2022 IMS Annual Meeting in Probability and Statistics**  
 27.06-30.06 Taming singular SDEs: A numerical method (London, UK)
- 2022 **Stochastic Seminar**  
 21.06-23.06 Regularization by noise-PDEs and Rough path theory (Padernborn, Germany)
- 2022 **CSH WORKSHOP: “Stochastic Dynamics for Complex Systems”**  
 01.06-03.06 Random dynamical systems generated by the solution to singular SDEs (Vienna, Austria)
- 2022 04.05 **IRS Seminar**  
 Singular SDEs and PDEs (WIAS, Germany)
- 2022 17.02 **Workshop: Regularization by Noise: Theoretical Foundations, Numerical  
 Methods and Applications**  
 Regularization by noise: a numerical (Wong-Zakai approximation) viewpoint (Oberwolfach,  
 Germany)  
 -2021
- 2021 01.12 **Seminar: Stochastic Analysis**  
 Taming singular SDEs: A numerical method (Tianjin University, China)(online)
- 2021 06.10 **Workshop: Junior Female Researchers in Probability**  
 Approximation for singular SDEs with unbounded drift (Harnack-Haus, Berlin, Germany)
- 2021 29.04 **SPDE seminar**  
 Wong-Zakai approximation for singular SDEs with unbounded drift (Technische Universität  
 Berlin, Germany)  
 -2020
- 2020 01.12 **Oberseminar: Stochastische Analysis**  
 Well-posedness of stochastic differential equations with singular drifts and Lévy noise  
 (Technische Universität Berlin, Germany)
- 2020 14.09 **DMV Annual Meeting 2020**  
 Well-posedness of stochastic differential equations with singular drifts and Lévy noise  
 (Technische Universität Chemnitz, Germany) (online)
- 2020 26.02 **DFG-NRF on-site review**  
 Regularity versus irregularity in PDEs and diffusions (Bielefeld, Germany)

- 2020 13.02 **Young researchers between geometry and stochastic analysis**  
SDEs with singular drifts and multiplicative noise on general space-time domains (Bergen, Norway)
- 2020 31.01 **Cluster Group Stochastic Analysis**  
SDEs with singular drifts and multiplicative noise on general space-time domains (II) (Bielefeld, Germany)
- 2020 24.01 **Cluster Group Stochastic Analysis**  
SDEs with singular drifts and multiplicative noise on general space-time domains (I) (Bielefeld, Germany)  
-2019
- 2019 16.12 **Cluster Group Stochastic Analysis**  
Stochastic differential equations with singular drifts and multiplicative noises (Bielefeld, Germany)
- 2019 15.11 **Cluster Group Stochastic Analysis**  
Strong well-posedness for stochastic differential equations with coefficients in mixed-norm spaces (Bielefeld, Germany)
- 2019 15.01 **IRTG Seminar**  
SDEs with distributional valued drift driven by  $\alpha$ -stable processes (Bielefeld, Germany)  
-2018
- 2018 29.10 **IRTG Seminar**  
SDEs with singular coefficients and Partial differential equations (Bielefeld, Germany)
- 2018 19.10 **BGTS Doctoral Day**  
SDEs with singular coefficients (Bielefeld, Germany)

## Research interests

**Stochastic analysis, Singular stochastic (partial) differential equations, Regularization by noise, Rough path, Random dynamical systems, Stochastic numerical analysis, Application of stochastic analysis and PDEs (e.g. machine learning)**

## Preprints

- 1 SDEs with singular drifts and multiplicative noise on general space-time domains, C. Ling, M. Röckner, X. Zhu, <https://arxiv.org/pdf/1910.03989.pdf>. (*Selected as one of the 'top ten representative papers from IRTG 2235'*)
- 2 Taming singular stochastic differential equations: A numerical method, K. Lê, C. Ling, <https://arxiv.org/pdf/2110.01343.pdf>
- 3 Expansion and attraction of RDS: long time behavior of the solution to singular SDE, C. Ling, M. Scheutzow. <https://arxiv.org/pdf/2211.14202.pdf>
- 4 Path-by-path uniqueness for stochastic differential equations under Krylov-Röckner condition, L. Anzeletti, K. Lê, C. Ling. <https://arxiv.org/abs/2304.06802>
- 5 The Milstein scheme for singular SDEs with Hölder continuous drift, M. Gerencsér, G. Lampl, C. Ling. <https://arxiv.org/pdf/2305.16004.pdf>
